

Less clank...**more** cha-ching.

Zirc's resin cassettes offer the durability and performance with a smaller price tag and bigger return.

Why Resin vs. Stainless Cassettes?

- **Attractive Colors:** 16 color options for easy identification
- **Antimicrobial:** Reduces bacteria, mold & mildew
- **Resistant to Heat:** Cools rapidly out of autoclave
- **Never Corrodes:** Resin material does not oxidize
- **Economically Priced:** Up to 78% less than stainless
- **Patient Perception:** Attractive and Organized
- **Durable:** High quality fiber-filled resin

Your instruments just got an upgrade

Zirc's resin cassettes match up to stainless steel in both performance and durability, but at a fraction of the price. These sterilizable cassettes are heat resistant and do not oxidize like stainless steel. Choose from 16 different colors to create an organized and more attractive dental practice, improving staff morale and patient experience.

Resin Cassette Benefits:

- 16 attractive color options for easy identification
- Antimicrobial protection reduces bacteria & mold
- Product cools rapidly out of autoclave
- Does not oxidize over time and never corrodes
- Economical and lower in price than stainless steel
- Made with durable and high quality fiber-filled resin

Worried that cassettes won't fit your autoclave?

MAXIMUM SPACE & QUALITY

Zirc's resin cassettes are slim in size compared to stainless steel. Offering a low profile under 1.5" tall, these cassettes maximize the usable space in ultrasonics and autoclaves. They are made of high quality fiber-filled resin and are heat resistant, providing optimal performance and longevity.
